### **DETAILED ACTION**

Receipt is acknowledged of the request for continued examination filed 07/10/2009.

The rejections under 35 USC 102(b) over Biegalski et al, 35 USC 103(a) over Theramex, and 35 USC 102(b) over Virotext are withdrawn in view of applicant's amendments.

The rejection under 35 USC 101 was not addressed in the response. Given that applicant has amended the claims to read on specific mucoadhesive and pH-sensitive polymers the rejection is withdrawn, A new rejection will be rewritten as an obviousness-type double patenting rejection over that application, which is also US Application Serial No. 10/072,320 .

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-16, 18-34 provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-33 of copending US Application Serial No. 10/072,320 (US'320). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'320 claims a gel having a solvent vehicle, at least one pH-insoluble swellable mucoadhesive polymer, at least one pH-sensitive film forming polymer, and a molecule of interest (See claim 1). The amount of solvent is set out in claim 2. Specific examples of water swellable mucadhesive polymers are specifically recited in claims 3-5. Ph-sensitive polymers are recited in claims 6-8. Molecules of interest are set out in claims 9-14. As such, it would have been well within the skill of the ordinary practitioner to claim the instant invention and further to set out the specific mucoadhesive polymer and pH-sensitive polymers of the instant invention with a reasonable expectation of similar therapeutic results. The instant invention would have therefore been obvious to one of ordinary skill in the art at the time of invention given the claims of US'320.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
